## Most Viewed

See if you can initiate a product slide here to accommodate more most view products

## What's New? All Products

What's new should replace "latest"

There's no adjustment here other than the above name change.

## Shop by brands

This title should replace the "Brands we work with" to avoid legal implications

## What other customers are saying

**Footer** background should be white. The font can utilize your blue choice

### Additional information for mobile view

The currency selector was swapped to avoid the loss of information when changing currency using the mobile View. You can open the link on your mobile to get a good view as to what I'm saying.

You can utilize your blue color that exists when necessary

You can retain your search bar type, the one present on the desktop view.

You should explore using round fonts like **Arial Round MT** or any other font that possesses round edges. Full capitalized wordings shouldn't be used. The usual First letter cap, and rest letter un-capped should be employed.

The buttons (clickable buttons) should be a bit round-edged instead of Square. 

The place-holder should not show up borderlines to enable the above front page display depicted.

If possible, the part of the place-holder that holds cart, Wishlist and compare should have a slight round edge similar to the buttons.

The borderline demarcating each placeholder should be almost invisible as depicted above using simple lines.

You can add the social media icons on the empty space between the naira symbol and Sign in.

The sign in form should provide new user the option to sign-up
